Comments:

DISCLAIMER: The Electronic Data files provided with this Data Transmittal are for information only and to be verified in the field by the Contractor. ADPorts Group does not warrant that the data is accurate or complete and shall not be liable for any error or omission in the content of this electronic data, nor for any consequences thereof. The supply of this data does not relieve the contractor from any responsibility under the contract to perform the works in accordance with the requirements of the contract, which is their sole responsibility. Where the data relates to a particular drawing, the CAD data may have been prepared at a different time from the production of the drawing and may not accurately reproduce the issued drawing. In particular where copies of issued drawings are required they are not to be produced from a CAD copy of the data as this is not guaranteed to produce the same drawing. Only hard copy drawings issued to the Contractor under the requirements of the contract may be used to produce copies. The CAD Reference Models supplied are attached as XRefs to multiple drawings. The contents of the XRef Models may have been revised between the production of the different drawings where those drawings were produced on different dates. Where those XRefs have been used multiple times (and have the same filename each time) only the latest (chronological) version of each model has been included. This may mean that the content of earlier drawings is different from the issued hardcopy version of the drawing. It is the Contractors responsibility to ensure that the CAD version of each drawing provided here correctly reproduces the issued hardcopy drawing prior to making use of that data for whatever purpose. Xref Models included here are at the revision that was attached to the drawings at the time of issue. They may have been superseded since the drawings were prepared and may have been supplied in a separate DTF submission at a later revision. Contractor to verify that they are using the latest supplied version of applicable Xrefs.

This is system generated Transmittal copy, so acknowledgment is not required. All acknowledgments originate through emails' confirmation which will be auto recorded in the system.

Client MARWAN BIN ATEEJ AL MEHARI	ENMAA Engineering Consultants	Main Contractor TAMM Contracting
